

AYUSH KUMAR

Software Engineer / SDE Intern

7065aayush@gmail.com • github.com/aayushtiwari13 • linkedin.com/in/aayushtiwari2007 • Delhi, India

EDUCATION

Bharati Vidyapeeth's College of Engineering, Delhi — GGSIPU

B.Tech. in Information Technology | 2025 – 2029 CGPA: 8.09

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, HTML, CSS

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs, Searching, Sorting, Recursion, Backtracking, Greedy Algorithms, Heaps

Frontend: React.js, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js, REST APIs, MongoDB

AI / Document Processing: OCR, PaddleOCR, NLP fundamentals

Tools: Git, GitHub, VS Code

PROJECTS

Intelligent Land Record Digitization & Validation System

AI / OCR • Backend Integration • Hackathon Project

- Developed backend integration for an AI-powered system designed to digitize and process **handwritten, scanned, and legacy Indian land records**.
- Integrated **PaddleOCR** into the document-processing pipeline to extract textual information from uploaded land-record images and documents.
- Worked on API-level integration between the OCR processing layer and the application backend to support automated document processing.
- Contributed to a workflow for extracting key land-record information such as **landowner details, survey/khasra numbers, plot area, location, and ownership-related data**.
- Designed the integration with a manual-verification workflow in mind to help handle OCR errors and improve reliability of extracted records.

Allie — Personal AI Assistant

HTML • CSS • JavaScript

- Built a browser-based personal AI assistant using **HTML, CSS, and JavaScript**.
- Implemented an interactive user interface focused on conversational interaction and assistant-style functionality.
- Used JavaScript to manage user interactions, application logic, and dynamic UI behavior.

React Projects & Applications

React.js • JavaScript • Redux Toolkit • APIs

- Built multiple React applications while working with **components, props, hooks, Context API, Redux Toolkit, localStorage, and API integration**.
- Implemented reusable UI components and client-side application state management using **Redux Toolkit**.
- Developed authentication-oriented projects and practiced integrating frontend applications with backend APIs.

PROBLEM SOLVING

LeetCode: 250+ problems solved **Primary Language:** C++

- Strong foundation in **Data Structures and Algorithms** with extensive practice across arrays, strings, linked lists, trees, graphs, recursion, backtracking, heaps, binary search, and greedy algorithms.
- Regularly practice problem solving with emphasis on **time and space complexity, pattern recognition, and optimized solutions**.

ADDITIONAL EXPERIENCE / LEARNING

- Developed full-stack web development skills across the **React → Node.js → Express.js → MongoDB** stack.
- Built and tested REST-style backend services using **Node.js and Express.js**.
- Used **Git and GitHub** for source control and project development.
- Currently expanding knowledge of **OCR, NLP, and document-processing pipelines** through the land-record digitization project.

INTERESTS

Software Engineering • Data Structures & Algorithms • Full-Stack Development • AI-assisted Applications
